

TASCAM[®]
TEAC PROFESSIONAL

CD-A750

OVERVIEW

TASCAM has updated its best-selling combination CD players/cassette recorders to the CD-A750. Like TASCAM's CD-200, the new model employs TEAC's new CD-5020A drive mechanism, designed for audio playback with a smooth loading drawer and low clamping noise. New features include MP3 and WAV file playback, CD Text display, Auto Cue and Auto Ready. Also new is the digital output and pitch control for both the CD and cassette mechanisms.

The CD-A750 is a combination CD player and cassette recorder with unbalanced phono inputs and outputs, balanced XLR ins and outs, parallel and RS-232 control. It has contractor-specific features such as power-on play, a wired remote control, rackmountable design and shock memory on CD playback.

SPECIFICATIONS

- * RCA unbalanced inputs/outputs for Tape and CD
